BRONZE SPONSORS

It is with great pleasure that EARSeL and the local organizers at University of Valencia welcome all participants to this 13th EARSeL Imaging Spectroscopy Workshop.

Imaging spectroscopy science became more exciting than ever. Firstly, there has been an increase in the availability of airborne imaging spectroscopy data, as well as the development of operational processing chains and robust analysis methods. These advancements have contributed to more accurate and reliable analyses. Secondly, the emergence of new-generation spaceborne imaging spectrometers, both recently launched scientific precursor missions and upcoming operational ones, offers the potential for obtaining unprecedented levels of environmental information. These missions promise to deliver more accurate, frequent, timely, and large-scale data on the environment. Concurrently, there have been rapid advancements in Unoccupied Aerial Vehicles and close-range spectroscopy at more regional and local scales.

Furthermore, the progress in solar-induced fluorescence (SIF) and mid-infrared spectroscopy for environmental applications has further enhanced the relevance of Earth observation through imaging spectroscopy. These new developments have significantly expanded the applications of Earth observation and fostered greater interdisciplinary collaboration within the hyperspectral community.

As a result, the workshop series organized by the EARSeL Special Interest Group on Imaging Spectroscopy has attracted an increasingly international and interdisciplinary audience. It has gained recognition as one of the premier conferences on imaging spectroscopy for Earth observation in Europe and worldwide.

We extend a warm invitation to researchers, students, and professionals from Earth and environmental sciences who work with imaging spectroscopy data or engage in field and laboratory spectroscopy. We cordially welcome you at the 13th EARSeL Workshop on Imaging Spectroscopy in Valencia in 2024. The workshop will feature oral and poster sessions centred around emerging and mature hyperspectral topics, and an after-workshop day is offered to include tutorials and demonstrations.

Internet access

EDUROAM is available at ADEIT. For participants who may not have access to it, ADEIT provides wifi access. Configuration instructions are available in the rooms.

Posters

Posters will be displayed every day in a dedicated room (Room 0.1) throughout the workshop. Please hang your poster on the poster board according to the number indicated in the programme. Sticky pads to hang the posters are available at the venue. Posters have to be removed at the end of the day to leave the space for the next poster session. In the case a printing service is needed there is one near the ADEIT centre (named as "Servicio de Copiar Formato") at "Calle de l'Abadia de Sant Martí, 8"; Tel. +34 963 94 34 53.

Oral Presentations

Oral presentations will usually be of 12 min length plus 3 min for questions and change over to the next speaker. The length of the presentations may vary in some sessions depending on the planned number of presentations. Please check the workshop programme or consult the session chair, if unsure. Please upload your presentation as PPT or PDF file directly to the presentation laptop well before the session during breaks. From 30 min before the session start, there will be technical staff on site to assist with this.

Young Scientist Award

A first, second and third prize will be awarded for the best Young Scientists' oral and poster presentations.

Potentially 6 best oral presentations were already selected by the reviewers. The candidate talks are given in a dedicated plenary session (18th April at 10:30 in ADEIT assembly Hall). The winners will be selected during a live voting after the respective presentations with a poll accessed through a QR code shown after the presentations.

Eligible posters will be voted through a QR code. Note that only one time can be voted per person for a first, second and third award throughout the three days. Each day new posters will be displayed. Keep the voting for once having seen all posters.
